Index of Abstracts

Volume 7 (1986)

Abdelkader, Mostafa A. *Similarity solutions for a nonlinear spherically symmetric porous-media equation*, 237. *The motion of our moon in Geocosmos*, 266. *Exact solutions for a nonlinear system of differential equations of control*, 281. *Exact solutions for two strongly nonlinear differential equations*, 377. *Exact travelling wave solutions for a third-order nonlinear equation*, 435.

Abedessalam, Musbah. *A characterization of Banach spaces containing ℓ_1 by norm attaining linear functionals* (Preliminary report), 379. *On linear Kelly spaces* (Preliminary report), 436.

Abhyankar, Shreeram and **Kulkarni, Devadatta.** *On Hilbertian ideals*, 340.

Abian, A. and **Keremedis, K.** *On the definition of the forcing of the negation*, 246.

Abian, Alexander. *The A-transpose and the right A-inverse of an n by ∞ matrix*, 257. *A-limit point, a-convergence, a-compactness*, 382.

Abrams, Gene. *On rings R with R isomorphic to $RFM(R)$*, 33.

Abu-Muhanna, Yusuf and **Hallenbeck, David J.** *Univalent H^1 functions and subordination*, 48. *On extreme points of subordination families* (Preliminary report), 254.

Abu-Saymeh, Sadi. *On Hasse-Schmidt higher derivations*, 28.

Adams, Colin. *Cusp volumes in hyperbolic 3-manifolds* (Preliminary report), 308.

Adams, Jeffrey. *Method of descent* (Preliminary report), 43. *Lifting and duality of characters*, 427.

Adams, Jeffrey and **Vogan, David.** *Lifting of characters and the method of descent* (Preliminary report), 201.

Adams, Malcolm, Ratiu, Tudor and **Schmid, Rudolf.** *The group of Fourier integral operators as symmetry group*, 103.

Adomian, George. *Analytic solutions for nonlinear equations*, 60.

Aftabisadeh, Resa and **Wiener, Joseph.** *Oscillatory properties of first order linear functional differential equations*, 63.

Aggarwal, Alok and **Shor, Peter W.** *A linear time algorithm for computing the Voronoi diagram of a convex polygon* (Preliminary report), 425.

Ahangar, Resa and **Bogdan, Victor.** *Optimal controls for systems with Lipschitzian trajectories*, 107.

Ahern, Patrick and **Rudin, Walter.** *Boundary zeros of VMOA and H^p functions in the ball*, 173.

Ahmad, Shair and **Laser, Alan.** *Periodic solutions of a system of reaction-diffusion equations* (Preliminary report), 365.

Ahmed, N. U. *Identification of linear operators in differential equations on Banach space*, 150.

Akin, E. See **Lacker, H. M.**

Akin, Kaan. *Resolutions of representations* (Preliminary report), 346.

Albano, A. M. See **Greenbaun, N. N.**

Al-Bassam, M. A. *Application of fractional calculus to differential equations of Hermite's type*, 59.

Al-Bassam, M. A. and **Manocha, H. L.** *Lie theory of solutions of certain differintegral equations*, 162.

Alexander, H. *Polynomial hulls and finite linear measure*, 174. *Volumes of images of holomorphic maps in complex n-space*, 203.

Alexander, Herbert and **Wermer, John.** *A characterisation of points in the hull of a set* (Preliminary report), 281. *Envelopes of holomorphy and polynomials hulls* (Preliminary report), 377.

Alexander, Kenneth S. *The central limit theorem for weighted empirical processes indexed by sets*, 314.

Alexander, Ralph. *Applications of formulas of Schlafli to geometric inequalities* (Preliminary report), 111.

Alexanderson, G. L. and **Wetzel, John E.** *Cross-polytopic d-arrangements*, 164.

Ali Khan, Liaqat. *Neighbourhood separability in spaces of continuous vector-valued functions*, 437.

Aliprantis, C. D. *Factoring positive operators*, 97.

Al-Jarrah, Radwan. *On the Hermite interpolation of entire functions* (Preliminary report), 80.

Allard, William K. *Fixed point formulas for Dirac operators*, 129.

Allen, Roger W., Jr. *Constructing bijections: How it can benefit the undergraduate mathematics major* (Preliminary report), 156.

Almond, Russell G. See **Huber, Peter J.**

Alon, Noga, Frankl, Peter and **Rödl, V.** *Geometrical realization of set systems and probabilistic communication complexity*, 423.

Alspach, Brian, Locke, Stephen C. and **Witte, David.** *The Hamilton space of a Cayley graph on a finite abelian group*, 339.

Alspach, Dale and **Carothers, Neal.** *Constructing unconditional F. D. D.'s* (Preliminary report), 353.

Amgott, Steven. *Separable categories*, 35.

Anastassiou, George A. *The Levy radius of a set of probability measures satisfying basic moment conditions involving $\{t, t^2\}$* (Preliminary report), 80.

Ancel, F. D. and **Starbird, M. P.** *The shrinkability of Bing-Whitehead decompositions* (Preliminary report), 308.

Andersen, N. T., Giné, E., Ossiander, M. and **Zinn, J.** *Limit theorems for empiricial processes under local conditions*, 314.

Anderson, D. D. and **Dobbs, David E.** *Flatness, LCM-stability, and related module-theoretic properties*, 250.

Anderson, David F. *The Picard group of a monoid ring*, 226.

Anderson, Glen D., Vamanamurthy, M. K. and **Vuorinen, M.** *Dimension-free quasiconformal distortion in n-space*, 165.

Anderson, Joyce. *Estimating projected images*, 134.

Anderson, Marlow. *Hulls of Bezout domains from torsion-free classes of abelian ℓ-groups*, 17.

Anderson, Michael T. *Minimal surfaces in 3-manifolds of non-negative Ricci curvature*, 319.

Andrade, Horacio Hernández. *About solutions of integral equations*, 283. *A theorem about Lie derivative*, 383.

Andrews, Kevin T. and **Ward, Joseph D.** *Proximinality in operator algebras on L_1*, 351.

Anellis, Irving H. *The heritage of S. A. Janovskaja,* 3. *A minor mystery solved; Russell's 'On number',* 171. *Bonasoni and the history of analytic geometry, I. Bonasoni's geometrical algebra,* 367.

Angad-Gaur, H. W. K. *Homological dimension* (Preliminary report), 36.

Angell, T. S. and **Kleinman, R. E.** *Applications of complete families in inverse scattering problems,* 71.

Angell, T. S., Fast, S. A. and **Kle'nman, R. E.** *Boundary control for exterior Maxwell equations,* 108.

Anick, David J. *Computing rational homotopy groups is #P-hard* (Preliminary report), 123.

Ansari, Mohamad A. *Weak-star generators of $Z^n, n \geq 1$,* 92.

Arasy, J., Fisher, S. and **Peetre, J.** *Hankel operators on the Bergman space,* 163.

Armstrong, Thomas E. and **Sudderth, William D.** *Locally coherent exchange rates,* 214.

Aron, Richard M. and **Lohman, Robert H.** *A geometric function determined by extreme points of the unit ball of a normed space,* 91.

Arratia, Richard and **Waterman, Michael S.** *Critical phenomena in sequence matching,* 213.

Arthur, James. *Intertwining operators and residues,* 44.

Ash, J. M. *Summability of trigonometric series and generalized differentiation,* 82.

Ashtekar, Abhay. *Einstein self-duality,* 397.

Astala, K. and **Gehring, F. W.** *Injectivity, the BMO norm and the universal Teichmüller space,* 52.

Athavale, Ameer. *Holomorphic kernels and commuting operators,* 258.

Avram, Florin and **Taqqu, Murad.** *Limit theorems for bilinear forms in functions of moving averages* (Preliminary report), 314.

Awakeem, Nouria A. *Some results in join spaces,* 117.

Asarian, Mohammad K. *Lower near Frattini subgroups of amalgamated free products of groups* (Preliminary report), 37.

Aspeitia, Alfonso G. *Nonlinear programming and a generalized refraction problem,* 142.

Bachelis, Gregory F. and **Saeki, Sadahiro.** *Helson sets not of spectral synthesis and Banach algebras with uncomplemented radical,* 84.

Baer, Steven M. *Bifurcation analysis of a neuron model with active site* (Preliminary report), 149.

Baernstein, Albert, II. *Integral means of derivatives of univalent functions* (Preliminary report), 51.

Bagley, R. W., Wu, T. S. and **Yang, J. S.** *On connected groups,* 42.

Bahri, Anthony, Bendersky, Martin and **Gilkey, Peter.** *On the relationship between the cobordism and K-theory of cyclic groups,* 209.

Baica, Malvina. *Diophantine equations and identities* (Preliminary report), 160. *Trigonometric identities* (Preliminary report), 249.

Baildon, John D. *Visibility conditions* (Preliminary report), 112.

Bakelman, Ilya J. *Geometric concepts and methods in the theory of elliptic Euler-Lagrange equations* (Preliminary report), 366.

Baker, Mark. *The virtual Z-representability of certain three-manifold groups,* 358.

Bakke, V. L. and **Jackiewicz, Z.** *A note on the numerical computation of solutions to second order boundary value problems with state dependent deviating arguments* (Preliminary report), 137.

Baldwin, Stewart. *Some generalizations of extenders,* 7.

Ball, R. N. and **Hager, A. W.** *Extensions of archimedean ℓ-groups which distinguish archimedean kernels,* 17.

Ballotti, Michael E. *Almost periodic solutions of evolution equations,* 70.

Balogh, Zoltan. *On weakly G_δ-sets* (Preliminary report), 122.

Baloglou, George. *Some problems concerning compact-covering numbers,* 120.

van den Ban, Erik. See **Schlichtkrull, Henrik.**

Bankston, Paul and **Ruitenburg, Wim.** *$0-1$ laws for classes of relational structures* (Preliminary report), 5.

Bankston, Paul. See **Ruitenburg, Wim.**

Baouendi, M. Salah. *Local holomorphic extendability of CR mappings,* 176.

Bárány, Imre and **Füredi, Zoltán.** *Random polytopes in the ball,* 423.

Barbasch, Dan. *Character theory of spherical representation,* 200. *Unipotent representations and unitarity,* 429.

Barbut, Erol and **Bialostocki, Arie.** *Extremal and anti-Ramsey type problems in a certain family of tournaments,* 11.

Barker, George P. See **Poole, George.**

Barnard, Roger W. *Taylor coefficients of infinite Blaschke products,* 51.

Barnes, Ron. See **Oberhoff, Ken.**

Barth, K. F. and **Brannan, D. A.** *Asymptotic tracts of harmonic functions,* 52.

Barton, Thomas J. and **Friedman, Yaakov.** *Grothendieck's inequality for JB*-triples and applications,* 379.

Bashore, T. R. See **Greenbaun, N. N.**

Bator, Elizabeth. *A decomposition of bounded scalarly measurable functions taking their range in dual spaces* (Preliminary report), 91.

Bator, Elizabeth M., Lewis, Paul and **Race, David.** *Some connections between Pettis integration and operator theory,* 304.

Bauer, Heins. *Fine boundary limits and maximal sequences,* 405.

Bauldry, Wm. C., Mate, A. and **Nevai, P.** *Asymptotics for the solutions of several coupled recurrence equations* (Preliminary report), 80.

Baumgartner, James E. *Stationary and closed unbounded sets,* 4.

Bautista, Maurino P. *A nonlinear approach to inverse scattering by an acoustically soft obstacle,* 140.

Bayer, Margaret M. *Subdivisions of spheres* (Preliminary report), 423.

Beale, J. Thomas. *Large-time behavior of discrete velocity gas models,* 74.

Beals, Michael and **Metivier, Guy.** *Reflection of progressing waves in semilinear hyperbolic problems,* 68.

Bear, H. S. *Hardy spaces of heat functions,* 65.

Beard, J. T. B., Jr. *The Latimer-MacDuffee theorem for polynomial matrices and its consequences for matrix fields over $F[x], [F : F_p] < \infty$* (Preliminary report), 30.

Beasley, L. B. and **Brenner, J. L.** *Two generator groups IV conjugate pairs of generators in $PSL(2,q), PSL(3,p)$. The spread of the Mathieu groups. Cospread. Outer dimension,* 435.

Beckenstein, Edward and **Narici, Lawrence.** *A nonarchimedean Stone-Banach theorem*, 95.

Becker, Howard. *Supercompact cardinals in the world of AD* (Preliminary report), 5.

Becker, Richard A. and **Chambers, John M.** *Auditing of data analyses*, 402.

Bedford, Eric and **Taylor, B. A.** *The extremal plurisubharmonic function and a Dirichlet space*, 205.

Beech, David. *Reference models for command languages and user interface management systems* (Preliminary report), 403.

Beer, Gerald. *Continuous single valued functions that approximate convex valued multifunctions*, 110.

Beigel, Richard, Gasarch, William and **Owings, Jim.** *Terse sets and verbose sets*, 432.

Belanger, Alain. *A Fubini theorem for the Pettis integral*, 46.

Bell, Jonathan and **Cosner, C.** *Wavelike solutions to diffusion-reaction equations on a cylinder*, 181.

Bell, Murray and **Ginsburg, John.** *On complete partially ordered sets and compatible topologies* (Preliminary report), 438.

Bell, Steven R. *Riemann mapping theorems in several complex variables*, 174.

Bellamy, David P. and **Diamond, Beverly.** *Geometric compactifications of Euclidean space* (Preliminary report), 330.

Bellenot, Steven F. *Banach spaces with trivial isometries*, 96.

Bellomo, Nicola and **Sarafyan, Diran.** *On the decomposition method and some comparisons with Picard's iterative scheme*, 61.

Ben-David, Shai. *Full reflection of stationary sets*, 220.

Bendersky, Martin. *The chromatic Hopf invariant*, 209.

Bendersky, Martin. See **Bahri, Anthony.**

Bengtson, Thomas. *Integrals of zonal polynomials over P_n* (Preliminary report), 58.

Benharbit, A. See **Obaid, S. A.**

Bennett, Colin and **Sharpley, Robert.** *The Lorentz-Shimogaki lemma and substochastic operators*, 99.

Berenstein, Carlos A. and **Yang, Paul C.** *Inverse Pompeiu problem in n dimensions*, 69.

Berger, Charles A. and **Coburn, Lewis A.** *Toeplitz operators on the Segal-Bargmann space*, 89.

Berger, M. S. *A global functional analysis approach to equivalence problems*, 128.

Berkson, Earl and **Gillespie, T. A.** *Fourier series criteria for operator decomposability*, 185.

Berlinsky, Allan M. *Underwater sonar simulation—Techniques of modeling a sonar guidance system*, 144.

Berman, Robert and **Cohn, William.** *Radial Phragmén-Lindelöf theorems for functions of slow growth*, 202.

Bernau, Simon J. *Weak sequential continuity of the lattice operations in M-spaces*, 89.

Bernfeld, S. R. See **Salvadori, L.**

Bernstein, Israel and **Harper, John R.** *Cogroups which are not suspensions*, 209.

Bernstein, J. N. *On the Kazhdan-Lusztig conjecture*, 429.

Bernstein, Joseph N. *Representations of p-adic groups and algebra of abelian categories*, 44.

Beslagic, Amer and **vanDouwen, Eric K.** *Normality of subsets of ω^**, 118.

Bestvina, Mladen. *Degenerations of the hyperbolic space* (Preliminary report), 311.

Betke, Ulrich and **Gritsmann, Peter.** *Projection algorithms for linear programming* (Preliminary report), 426.

Betounes, David. *Contact equivalent Lagrangians in classical field theory* (Preliminary report), 115.

Bhaskaran, M. *On Cowling's problem concerning the area of a region*, 232.

Bhatnagar, R. K. and **Vayo, H. Westcott.** *Laminar flow of a viscoelastic fluid through a porous annulus*, 140.

Bhattacharya, Prabir. *Some combinatorial identities in a Coxeter group* (Preliminary report), 246.

Bhattacharya, Rabi N. *The central limit theorem for ergodic Markov processes and convergence to Gaussian random fields indexed by functions*, 315.

Bialostocki, Arie. See **Barbut, Erol.**

Bien, Frederic. *On D-modules and symmetric spaces*, 199. *Spherical D-modules*, 429.

Billera, Louis J. *Piecewise polynomial functions on simplicial complexes*, 423.

Billera, Louis J. and **Magurn, Katherine E.** *Balanced subdivision and enumeration in balanced spheres*, 11.

Bilyeu, Russell G. and **Lewis, Paul W.** *Gateaux differentiability at a dense set of points uniformly in a specified set of directions*, 304.

Bini, D. and **Pan, V.** *A logarithmic Boolean time algorithm for parallel polynomial division*, 264.

Birkenmeier, Gary F. *A generalization of FPF rings* (Preliminary report), 31. *Distributive and medial elements of a groupoid* (Preliminary report), 346.

Birman, Joan. See **Wensl, Hans.**

Blass, Piotr. See **Lang, Jeff.**

Blass, Piotr. See **Lang, Jeffrey.**

Blecksmith, Richard, Brillhart, John and **Gerst, Irving.** *Partition function parity theorems and theta function identity analogues*, 225.

Bloom, Gary S. and **Hsu, D. F.** *Adjacency matrices of labeled graphs*, 14.

Blows, T. R. *Bifurcation from degenerate foci* (Preliminary report), 62.

Boardman, J. M. *Beyond* Cotor^0 (Preliminary report), 210.

Boas, Harold P. *The Szegö projection: Sobolev estimates in regular domains*, 174.

Boas, R. P. and **Brenner, J. L.** *Asymptotic behavior of inhomogeneous means*, 376.

Boe, Brian D. *Structure of generalized Verma modules* (Preliminary report), 302.

Bogdan, Victor M. *Existence of solutions to non-anticipating operator differential equations for Bochner measurable functions*, 78.

Bogdan, Victor. See **Ahangar, Resa.**

Boggess, A. *The holomorphic extension of CR functions near a point of higher type* (Preliminary report), 176.

Bojanic, R. and **Divis, Z.** *Asymptotic behavior of partial sums of Fourier-Legendre series* (Preliminary report), 81.

Bolger, Edward. *A class of efficient values for games in partition function form*, 143.

Boman, Jan. *Invertibility of generalized Radon transforms*, 86.

Boman, Jan and **Quinto, Eric Todd.** *Support theorems for generalized Radon transforms*, 87.

Bona, Jerry, Souganidis, Panagiotis and **Strauss, Walter.** *Stability and instability of solitary waves of KdV type*, 71.

Borning, Alan. *Constraints and interactive computer graphics*, 402.

Bourgain, Jean. *Geometry of convex sets and maximal operators*, 185.

Bowers, Philip L. *Dense embeddings of nowhere locally compact separable metric spaces*, 307.

Boyce, D. J. See **Woods, Dale.**

Boyer, Charles P. *Self-dual and anti-self-dual Hermitian metrics on compact complex surfaces*, 328.

Boyer, Steven. *Proper powers in free products and Dehn surgery*, 413.

Braden, Bart. *The triangle inequality for contour integrals*, 52.

Brakke, Kenneth A. *Plane Voronoi tessellation second order statistics*, 235. *Edge length distribution of random Voronoi tessellations*, 384. *Random Voronoi tessellations generated by non-Poisson point sets*, 439.

Brand, Neal. *Polynomial isomorphisms of combinatorial objects*, 12. *Isomorphisms of combinatorial objects*, 340.

Brannan, D. A. See **Barth, K. F.**

Brannan, James R. See **Reneke, James A.**

Brawley, Joel and **Schnibben, George E.** *On infinite algebraic extensions of finite fields*, 27.

Brechner, Beverly L. *A three-dimensional prime end theory* (Preliminary report), 335.

Breen, Marilyn. *Characterizing certain unions of starshaped sets*, 109.

Brennan, Joseph P. *The Cohen-Macaulay type of a determinantal ideal* (Preliminary report), 343. *The invariants of the additive group in characteristic p* (Preliminary report), 346.

Brennan, Michael. *Perturbed smoothing processes* (Preliminary report), 316.

Brenner, J. L. and **Carlson, B. C.** *Homogeneous mean values: weights and asymptotics*, 376.

Brenner, J. L. See **Beasley, L. B.**

Brenner, J. L. See **Boas, R. P.**

Brick, Stephen G. *Normal-convexity and equations over groups*, 281.

Brieskorn, Egbert. *Braids and singularities*, 421.

Brillhart, John. See **Blecksmith, Richard.**

Bronson, Richard. *Computer simulations: A tutorial*, 138.

Bronson, Richard and **Jacobsen, Chanoch.** *Simulations of macro-sociological systems*, 147.

Brooks, Robert and **Tse, Richard.** *Isospectral surfaces of small genus*, 356.

Brosamler, G. A. *Diffusions on compact manifolds*, 407.

Brown, C. Hendricks. *Asymptotically conservative confidence-type intervals for nonrandomly missing data*, 215.

Brown, Johnny E. *A coefficient problem for non-vanishing H^p functions*, 49.

Bryant, John L. *Homogeneous ENR's*, 310.

Bryant, Robert. *Darboux's method from a modern viewpoint* (Preliminary report), 113.

Buchdahl, N. P. *Hypersurfaces in twistor spaces* (Preliminary report), 326.

Bucki, Andrsej. *Group of isometries of an almost r-paracontact Riemannian manifold*, 259.

Buja, Andreas. *Elements of a viewing pipeline for data analysis*, 401.

Bullett, Shaun. *Dynamics of polynomial implicit maps* (Preliminary report), 419.

Burgess, C. E. *Spheres in E^3 with tangent planes, double tangent balls, or double cones*, 309.

Burghelea, Dan. *Cyclic homology of commutative algebras*, 172.

Burgin, M. S. *Operations on spaces of distributions* (Preliminary report), 163. *Algebras of d-distributions* (Preliminary report), 230. *Universality for algebras of distributions* (Preliminary report), 256. *Upper multicardinals* (Preliminary report), 278. *Logical deductive varieties* (Preliminary report), 431.

Burke, D. K. and **Lutser, D. J.** *On powers of certain lines*, 118.

Burns, Dan. *Twistors and harmonic maps*, 338.

Burris, Stanley and **Willard, Ross.** *Clones and model companions*, 371.

Burton, Robert M. *Association of vector valued random measures* (Preliminary report), 316.

Burton, Robert M. and **Fransosa, Marie M.** *Positive dependence properties of point random fields* (Preliminary report), 315.

Buskes, G. and **Krans, P.** *The Hahn-Banach extension theorem for Riesz homomorphisms*, 231.

Buskes, Gerard and **Krans, Prsemo.** *Hahn-Banach theorems*, 92.

Butler, G. J. *Persistence for systems with delays*, 155.

Butler, John B. *On an inverse theory for Schrödinger's operator in momentum space for certain non-local potentials* (Preliminary report), 141.
